ACTION DESCRIPTION MEMORANDUM FOR STORAGE OF 380yd³ OF MIXED TRANSURANIC WASTE AT THE ROCKY FLATS PLANT

Attached is the Action Description Memorandum (ADM) for storage of an additional 380 cubic yards of mixed transuranic waste at the Rocky Flats Plant. This ADM was prepared in response to your staff's request, to facilitate a rapid NEPA determination if storage of mixed TRU waste becomes a short-term issue in the near future.

The relationship between the Environmental Assessment (EA) "An Environmental Assessment of Alternative Near-term Storage for RFP Mixed Transuranic Waste" being written by DOE Headquarters and this ADM needs to be explored in greater detail with regard to the possibility of segmentation. NEPA documents must address connected, interdependent, cumulative and similar actions in a single EA or Environmental Impact Statement [40 CFR §1502.4(a); 1508.25(a)]. The EA does not take into account the specific requirements of the proposed action at RFP described in this ADM.

Please review this ADM for a determination on the level of NEPA documentation required.

Contact Laura Frick, NEPA Division, at extension 4643, if you have any questions.
